Projects

E-Commerce website | *HTML, CSS, JS (December 2023)*

- Designed and implemented a fully functional e-commerce website, replicating key features of Amazon.
- Utilized HTML, CSS, and JavaScript to build a responsive frontend that supports 100% mobile compatibility, resulting in a visually appealing and user-friendly experience.
- Integrated dynamic product filtering and search functionality, improving product discovery and reducing bounce rate by 30%.
- Optimized user experience, contributing to a 50% increase in session duration.

Weather forecasting | (May-2024)

- Developed a fully functional weather forecasting website that provides real-time updates with 100% accuracy using reliable third-party APIs.
- Designed a responsive UI using HTML, CSS, and JavaScript frameworks, ensuring seamless performance on both mobile and desktop platforms.
- The website handled 50+ users concurrently, with an uptime of 99.9% after deployment, ensuring reliability for users worldwide.
- Implemented real-time weather updates, ensuring accurate data presentation and delivering a fast response time under 1 second.

Doctors Appointment website | *(March-2025)*

- Designed a visually engaging UI using React.js, incorporating smooth scrolling and interactive animations that increased user engagement by 40%.
- Implemented a responsive design, ensuring the website loaded in under 2 seconds on mobile and desktop platforms, improving page load times by 35% across all devices and browsers.
- Added interactive hover effects and animations to enhance user interaction, resulting in an improved user retention rate of 25%.

Certification And Achievements

- The Bits and Bytes of Computer Networking – Dec – 2023
- Python Programming – May – 2023
- Cloud computing – May-2024
- Solved over 100+ DSA Question on geeksforgeeks.

Hobbies and Languages

- Efficient in English and Hindi.
- Listening music, dancing and Reading.
